Box Beams

A testament to exceptional craftsmanship, our reclaimed box beams will transform your projects. Lighter in weight than solid beams, they will adapt seamlessly to your unique design and technical specifications. Transform your space with warmth and a unique sense of history with beams that can be constructed in any size, and in styles from rustic to modern.

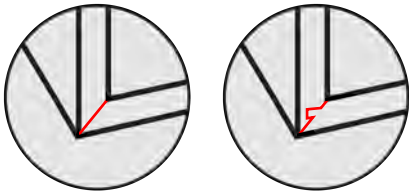
The Perfect Fusion of Tradition and Innovation

Choose from our wide selection of box beams, available in various species and surface treatments, to meet your construction project's unique requirements. Our reclaimed wood is sourced from historic structures and is often hundreds of years old. Once installed, our box beams will appear as if they are solid beams. Whether you prefer a natural look or a custom finish, our beams come in a range of styles from rustic to contemporary. Our beams come in standard widths and height and we offer custom oversize beams in any dimensions.

Edge Joints:



Miter Lock Miter

Source:
Reclaimed wood taken from barns and other old structures.
